

User Manual for the Eurovignette Portal

This is a user manual which will explain how to buy a Eurovignette in the Eurovignette portal. It is not intended to lay out or explain the legal requirements of the Eurovignette guidelines.

The Eurovignette portal offers all users the possibility to buy the electronic Eurovignette for the member states (Denmark, Luxemburg, the Netherlands and Sweden). In principle, commercial vehicles with a permissible total weight of more than 12 tons are required to pay a charge. An electronic Eurovignette is valid simultaneously in all member states.

No registration is required to use the Eurovignette portal.

In the Eurovignette portal, the Eurovignette can only be paid with fuel cards, fleet cards and credit cards in euros. It has a validity of at least 1 day and maximum 1 year.

Booking Explanations

The booking takes place in maximum 7 steps, which are explained below:

Step 1:

Enter licence plate number:

Please enter your vehicle licence plate number with all separators (as shown in your vehicle registration certificate) in the Licence Plate Number field.

It is not possible to enter umlauts and special characters.

Please replace letters such as Ö or Ø by O and letters such as Ä or Å by A etc.

Enter the vehicle country:

By clicking the radio button in the "Vehicle Country" field, you will get a list of all current country codes (the country is written in full after the country code).

Examples: A = Austria, CZ = Czech Republic, D = Germany, F = France

By inputting a series of letters quickly, you can also select the country code directly; for example "F I N" for Finland.

By inputting the first letter, you get to the top of all country codes starting with the corresponding letter.

You cannot select the country codes for Denmark and Sweden as the road user charge in these countries is collected by the relevant state institution.

Enter the axle class:

Please select the axle class in accordance with the number of axles of the truck trailer combination (including the trailer if applicable): “1 – 3 axles” or “4 or more axles”. If you do not know the number of axles, you have to select “4 or more axles”.

Enter the emission class:

Please enter the emission classes via the radio button. You will find the emission class for your vehicle in the vehicle registration certificate.

If you do not know the emission class or your emission class is not listed, you have to select “Euro 0”.

Enter the period of validity:

Please enter the period here, for which you would like to use the toll roads. The period of validity is at least 1 calendar day and maximum one year. **The validity starts at 0:00 hours on the 1st day of validity and ends at 24:00 hours on the last day of validity, at the earliest however at the time of the booking.** The start of the period of validity can also be in the future.

To confirm the entries, please press the “Continue” button. If you would like to terminate the process, press “Cancel”.

Step 2 (optional):

Please check your vehicle data and the period of validity once more. If you have entered data incorrectly press “Back” to return to the previous view.

Time optimization:

The Eurovignette tariff includes a price scale for daily, weekly, monthly and annual vignettes. The ideal price is automatically calculated according to the validity period you have specified. The ideal price is the most favourable combination of tariffs which covers the specified period of validity. For example, a weekly tariff could be cheaper than several daily tariffs.

If it is possible to book a Eurovignette with a longer period of validity for the same price, then this option will be offered. Thus in this case, you can choose whether you would like to buy a vignette only for the specified period or for the maximum possible period of validity at the same price.

In addition, there is also the “Detail” button. After pressing the button, the display shows how the Eurovignette has been calculated.

To confirm the entries, please press the “Continue” button. If you would like to terminate the process, press “Cancel”.

Step 5: Check the booking data:

On the following page all the booking data is listed once more including the (partly hidden) card number and also the price of the Eurovignette.

To confirm the data, enter the specified characters in the confirmation field. There must be no spaces in your entry.

Finally, the General Terms and Conditions have to be accepted. Click the check box to accept the conditions. A link on the end of the page redirects you to the General Terms and Conditions.

To confirm the entries, please press the “Book” button. The booking is then carried out. An authorization of the payment (Step 6) is required for specific credit cards. Once the booking has been carried out, a cancellation is no longer possible. If you would like to terminate the process without booking, then press “Cancel”. Press the “Back” button to return to the previous booking step.

This option is only available for bookings with petrol- and fleet card

After having entered the first booking, you can make further bookings. To this end you activate the button “MORE”. Now carry out Step 1 and 5 again. The selection and input of card data is not repeated. Your so far booked vignettes are not lost; they are saved in the shopping basket. In the shopping basket you can check the individual bookings under “Details”.

The Eurovignettes saved in the shopping basket are listed in an overview of vignettes. Here it is possible to remove resp. delete individual vignettes, if required.

Step 6 (optional for credit cards):

In this step you are forwarded to the authorization page of your credit card company. The purpose of this page is to authorize the payment.

Step 7: Print the booking confirmation:

All booking data including the Eurovignette number is displayed in this view. **Print the confirmation for your documents.**

To do this, please use the “Print” button to open the print view. In the print view, please press the “Print” link. You exit the print view via the “Close” link or by closing the browser window.

You are also able to display and have a pdf-file printed out. For this process please select the button “pdf”.

If several Eurovignettes are booked, you can have a summary receipt, which contains a receipt for each individual Eurovignette, printed out via the “pdf” button.

If you exit the view with the booking confirmation, you do not have another possibility to display or print the booking.

The booking process is thus complete. Press the “Quit” button to carry out another booking.

Documents

PDF files are available under the menu item Documents. You have the option to store the PDF files or to print the file. To do this, please press the “Download” button.

Refund information:

This document describes the refund process and the necessary conditions.

User manual:

This user manual for the Eurovignette portal is available as an additional document.

FAQ

Under the menu item FAQ you will find a list of frequently asked questions and the relevant answers.

A toll hotline is at your disposal from 8 am to 5 pm working days from Monday to Friday for any additional questions. Telephone Number: +49 (0) 1805 014653. The costs for a call depend on the location from which you are calling and the telephone provider.

Tariffs

You will get the current tariffs if you click the menu item “Tariffs”. The list is broken down into individual periods (one day, one week, one month and one year). Once you have chosen the required period, please select the corresponding emission class and axle number to get the tariff in euros.
